

The logo for UNO FARM, featuring the text "UNO FARM" in a bold, white, sans-serif font. The letter "O" in "UNO" is replaced by a white circle with a black dot in the center, resembling a stylized eye or a target. The background is dark blue with abstract, torn-paper-like shapes in red and white with a halftone dot pattern.

**UNO FARM**

**MAXIMIZE PROFITS**  
**MINIMIZE RISKS**  
**SAVE TIME**

Our goal is to deliver one tool that provides access to  
all the best yield generation opportunities in DeFi

Our mission is to bring together all the best yield sources in DeFi into one tool. To not only provide a unified interface to all of the major farms and liquidity pools, but also to automate and maximize your yield generation. To let you earn more and safer than you could ever do operating manually.

# MISSION

# DEFI MARKET

# DEFI MARKET

DeFi attracted more than \$106 billion deposits in just one year.

Most of that money is locked up in various protocols, bringing investors additional returns.

Cryptocurrency market capitalization already exceeds \$2 trillion, which suggests that the DeFi sector is at the initial stage of its development.

# UNIQUE VALUE PROPOSITION

05

## APY VOLATILITY PROBLEM

The APYs in the liquidity pools are constantly changing, causing the user's liquidity to run in inefficient pools most of the time.

And this ultimately leads to a 30 to 80% loss of revenue

## AUTOMATED CROSS-CHAIN LIQUIDITY MANAGEMENT SOLUTION

UNO continuously analyzes yield parameters in hundreds of carefully selected pools across the entire DeFi ecosystem and controls that each user's liquidity is located in the most efficient and safest of them.

In many cases, this makes UNO more efficient than its closest competitors by an average of 55%

# MORE EFFICIENT THAN COMPETITORS

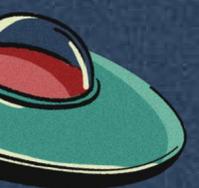

In many cases, this makes UNO more efficient than its closest competitors by an average of 55%

YIELD POOLS	AVG PLATFORM APYS					AVG UNO OUTPERFORMANCE
USDC-USDT	Sushi 7.42%	QuickSwap 9.21%	Curve 8.52%	JetSwap 1.96%	UNO 11.65%	153%
DAI-USDC	Sushi 4.36%	QuickSwap 14.58%	Curve 9.91%	SpiritSwap 4.15%	UNO 16.54%	143%
ETH-USDT	Sushi 22.56%	QuickSwap 22.57%	BiSwap 17.72%	MDEX 13.49%	UNO 55.14%	202%

[\\*Source and more analytics](#)

# PROBLEMS

## SAFETY PROBLEM

DeFi projects can contain vulnerabilities, which can lead to a loss of the entire customers portfolio. There is a lack of insuring mechanisms for customers funds and also current yield farming instruments do not have any way of rescuing user's funds when the user loses their wallet access or dies

## UNO SAFETY SOLUTIONS

- Internal audits for new protocols implemented
- Anti rugpull system (frontrunning solution)
- Fair reward distribution
- Insurance pool
- Inheritance mechanism

## TIME-CONSUMING AND HIGH BARRIERS OF ENTRY

An effective approach to investing in Yield Farming protocols requires users to have experience with DeFi and involves engaging and spending a lot of time on both continually researching and reviewing new DeFi projects as well as managing one's current portfolio

## UNO UX SOLUTIONS

- Simplified & user friendly user flow
  - Single-asset entry to the pools
  - Advanced portfolio analytics
  - FIAT gateway
  - Ready-to-use staking solution for B2B and B2C
- 

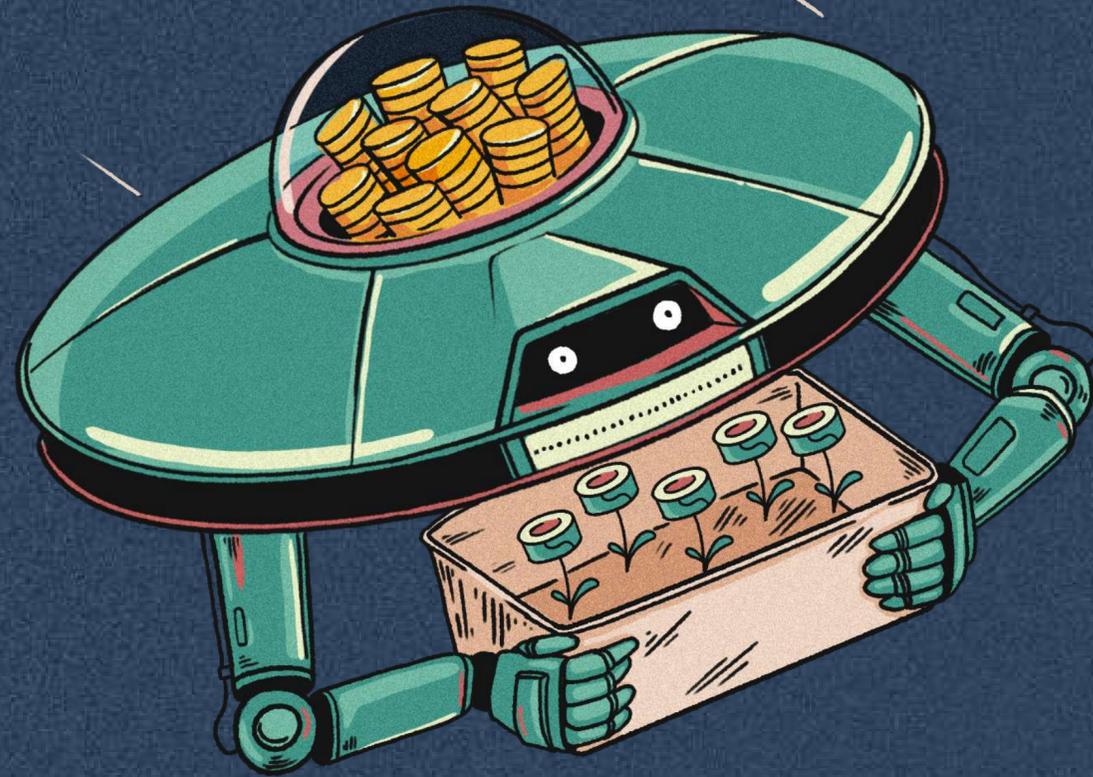

# MORE ADVANCED THAN COMPETITORS

UNO is much more advanced and functional than closest competitors

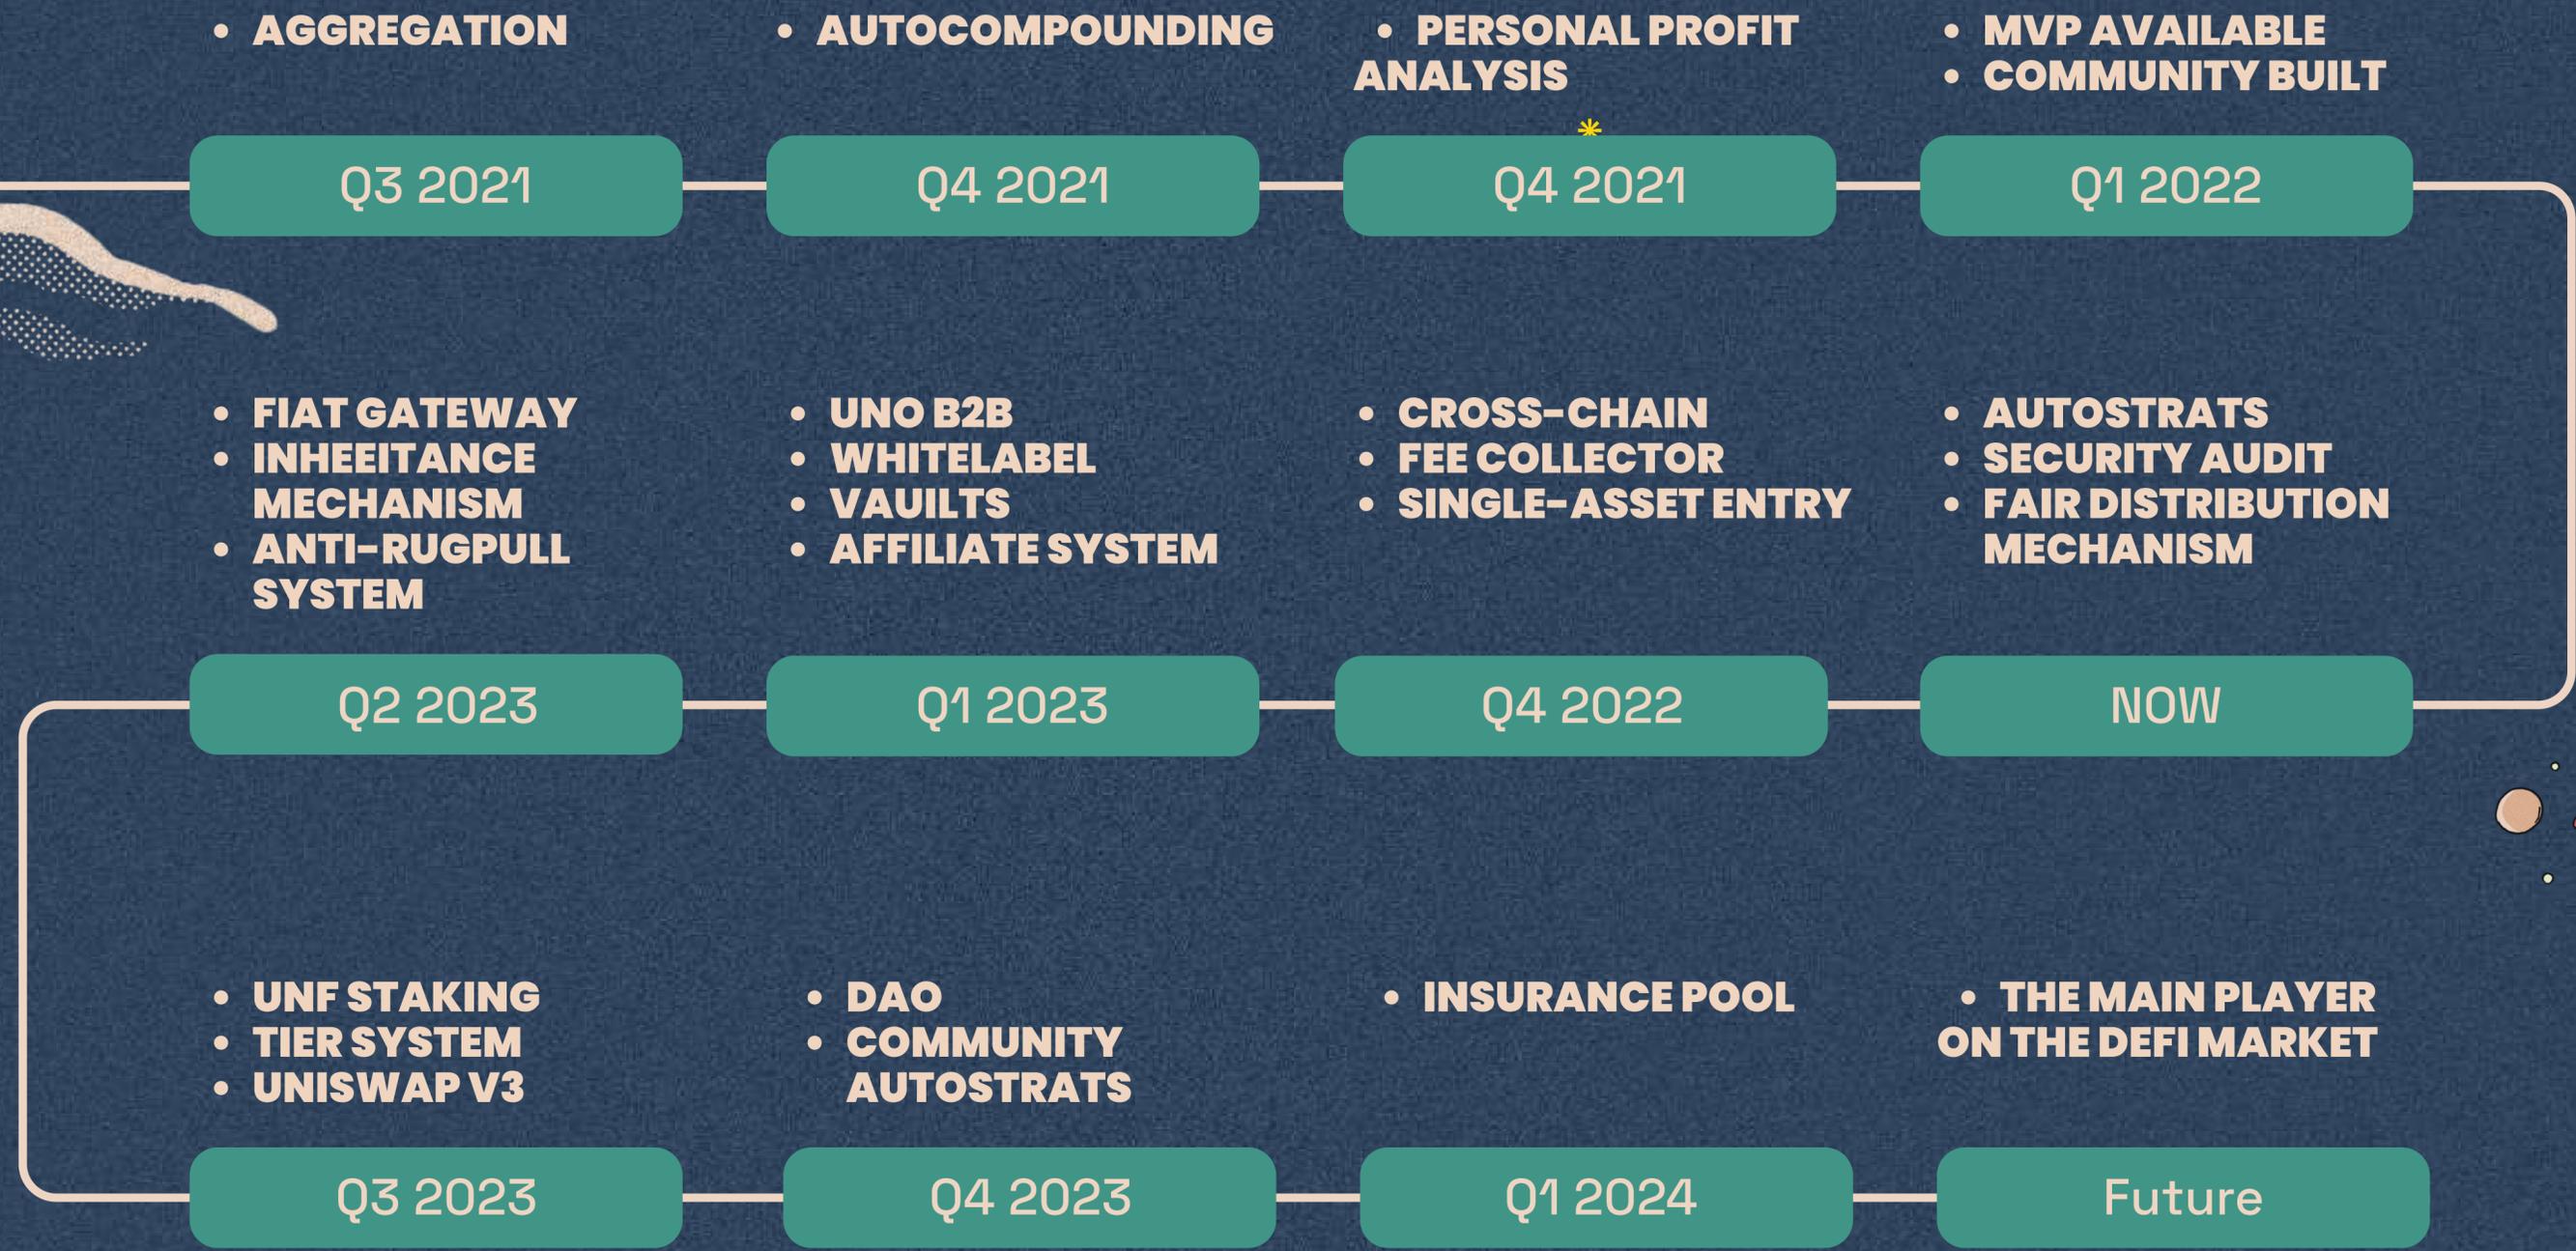

Protocol	Aggregation & autocompounding	Autoswitching for highest yield	Insurance	Inheritance mechanism	Userflow	Chain	Fee	TVL
<b>UNO.FARM</b>	+	+	+	+	Simple	Cross	4%	200k
Yearn.finance	+	-	-	-	Diff	Multi	20% + 2% Management Fee	7b
Beefy.finance	+	-	+/-	-	Diff	Multi	4.5-10% & 0.1% withdrawal fee	1.2b
Alpaca.finance	+	-	+/-	-	Diff	Multi	5-19%	1.8b
Arrakis.finance	+	+/-	-	-	Diff	Multi	10%	1.46b

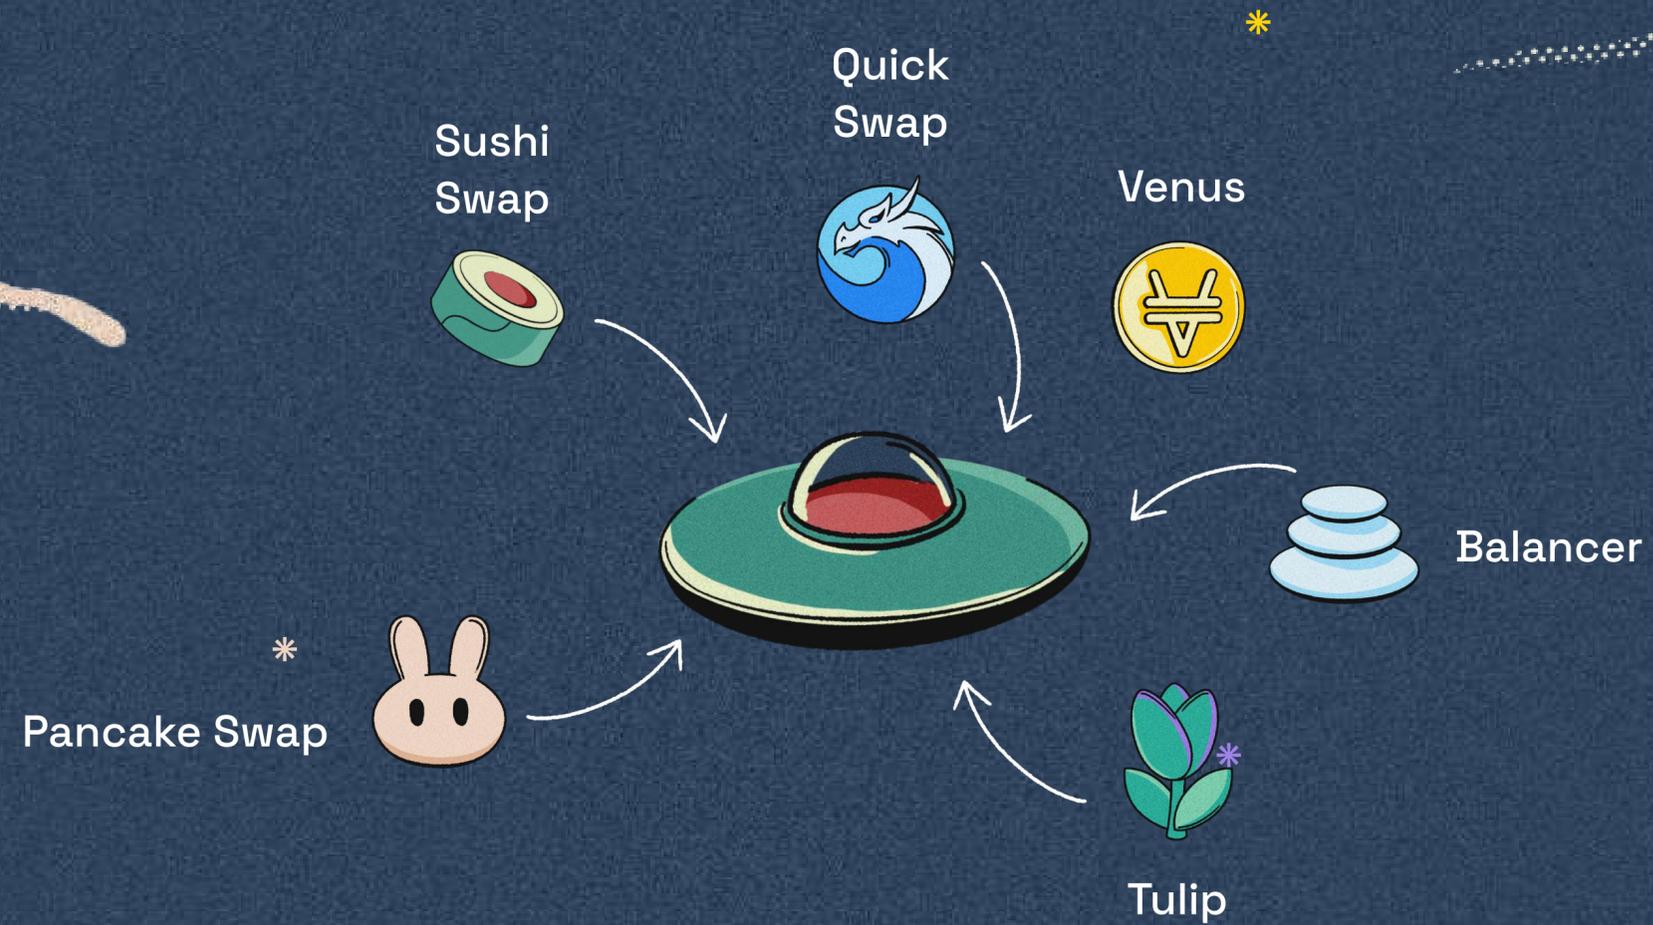

# ROADMAP & FEATURES

# ROADMAP

# AGGREGATION

Aggregating the best farming, lending and liquidity providing opportunities in one tool

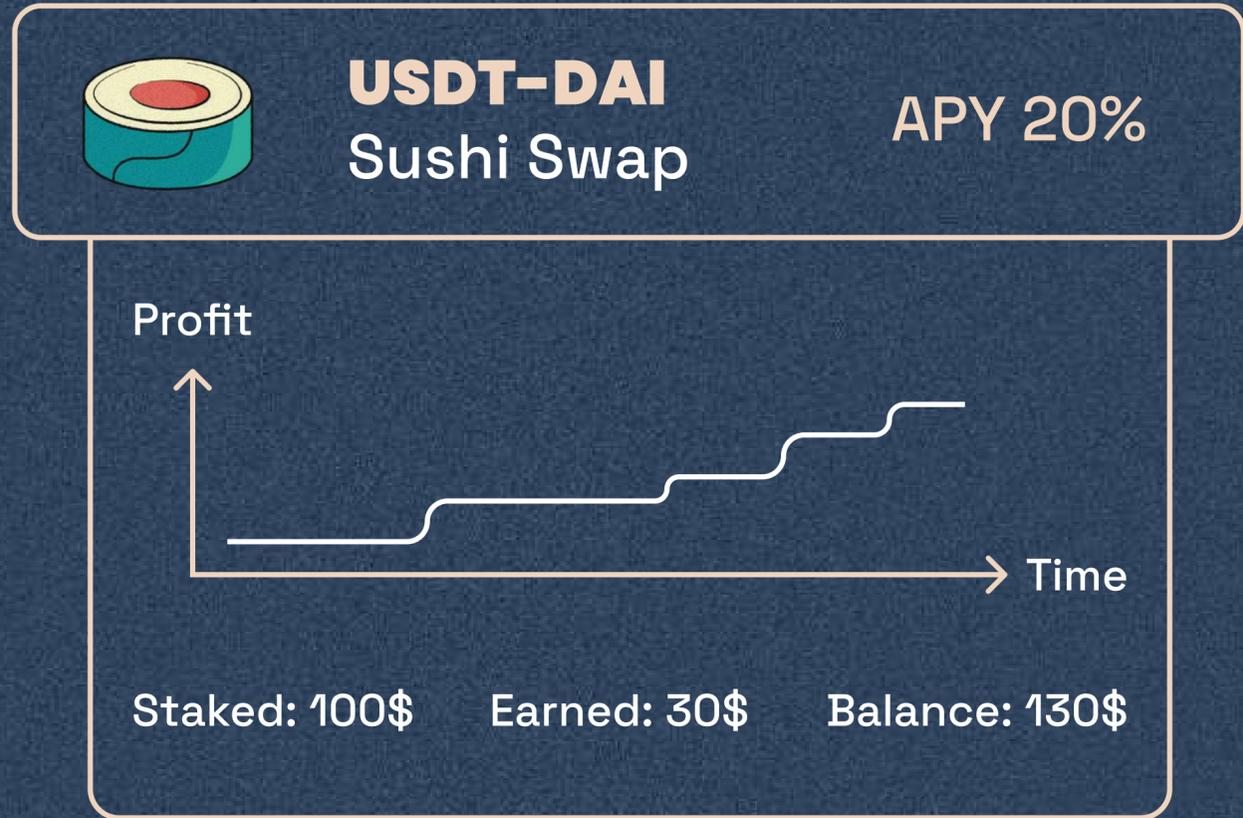

# AUTO COMPOUNDING

Compounding the profit farmed at optimal intervals to maximize APY

# PERSONAL PROFIT ANALYSIS

Users get convenient analytics about their portfolio growth

**INSURANCE**

Deposit

Insurance pool to repay in case of any protocol failures

# INHERITANCE MECHANISM

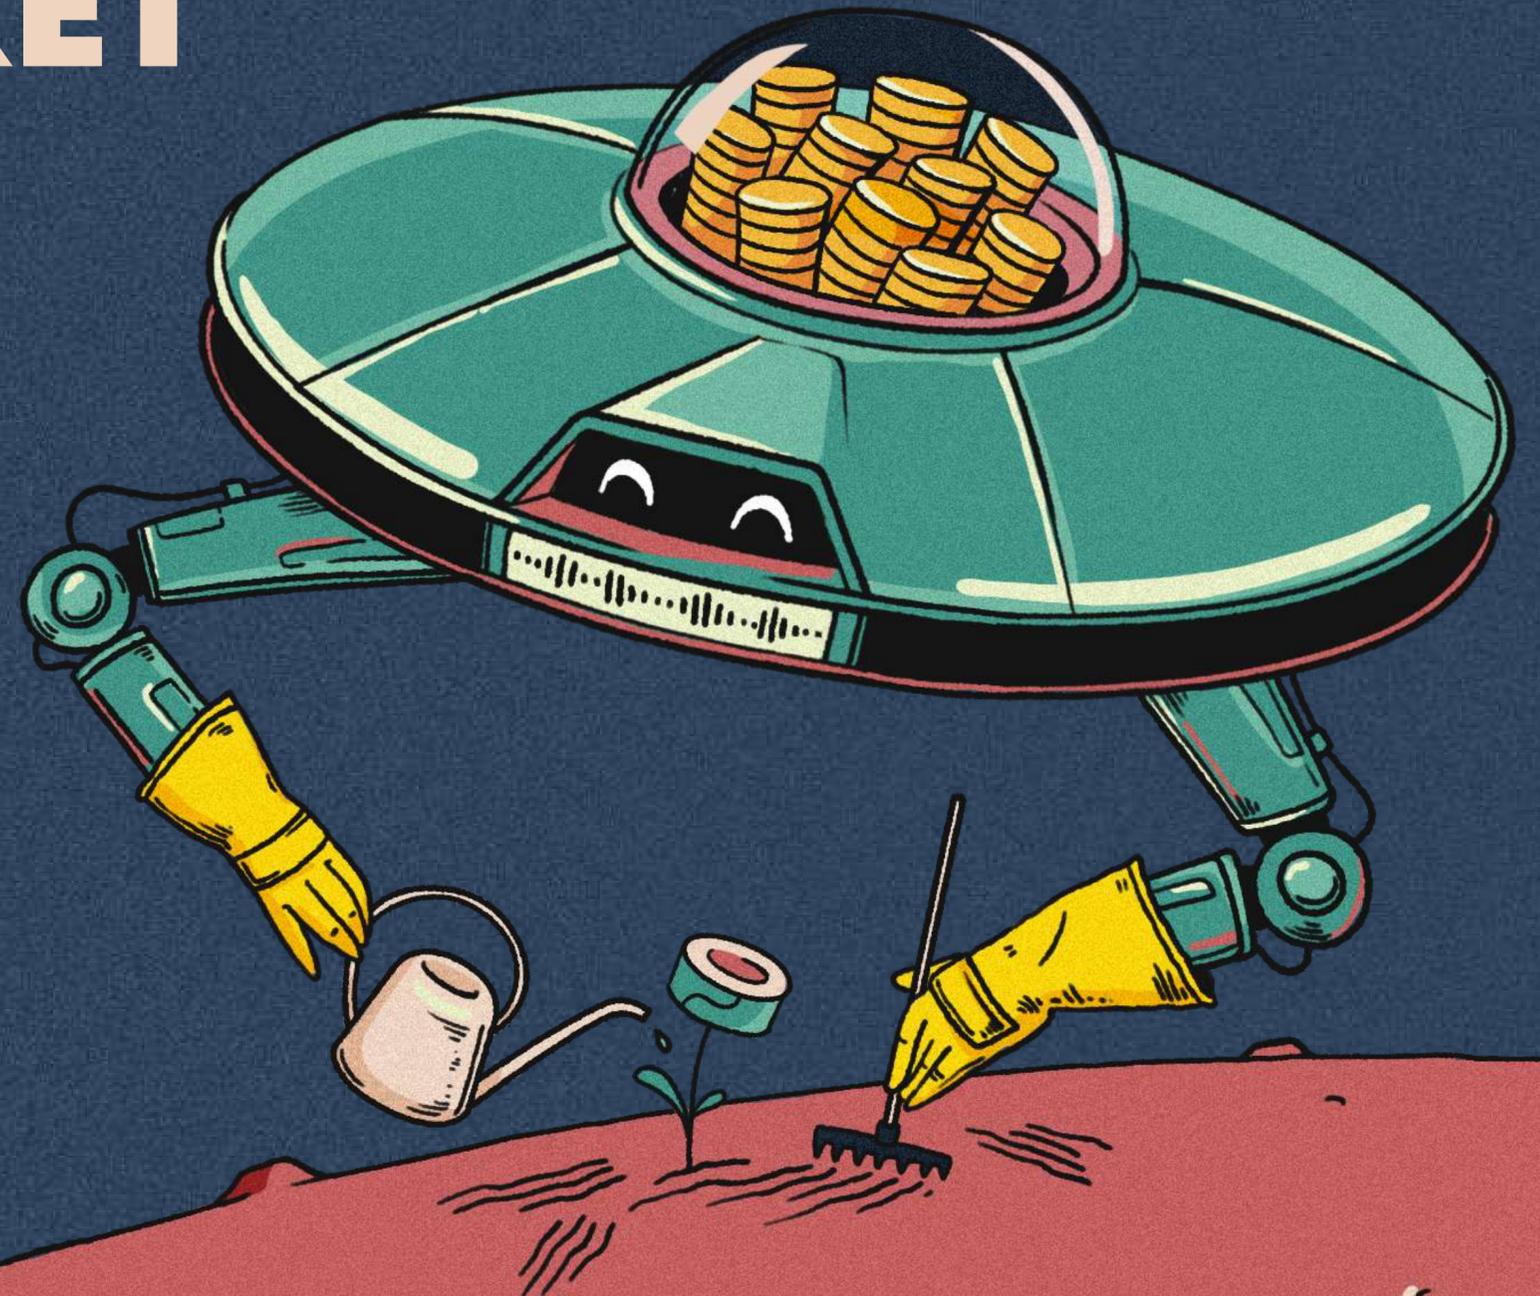

Inheritance mechanism to prevent loss of access to funds

# THE MAIN PLAYER ON THE DEFI MARKET

The DeFi market is growing at a rapid pace and we're growing along with it. Providing the best product to maximize returns and risk management, we will take a key place in the new economy

# **TOKEN UTILITY**

## **TIER SYSTEM**

User will have access to different platform features by Tier system and get more LP rewards on each of them.

Tier 1 Aggregation and auto-compounding, Fiat Gateway, Basic Profit Analysis.

Tier 2 Intelligent management, Insurance pool, Advanced Profit Analysis, Uniswap V3 strategies, Debit Card

Tier 3 Cross-chain liquidity swaps, Inheritance mechanism

Tiers can be gained by \$UNF staking.

## **NEW TOKEN'S POOL LISTINGS**

New projects stake \$UNF token and create UNF-Project token pool, incentivising it with the LP rewards from the protocol.

## **CUSTOM AUTOSTRATEGIES**

Custom autostrategies are publicly available to the UNO community and can provide income in \$UNF tokens to their authors

## **GOVERNANCE**

Stake \$UNF and start voting in the DAO

## **AFFILIATE SYSTEM**

Refer a friend and get \$UNF

## **FIAT GATEWAY**

Fee discounts when \$UNF is a base currency for the Fiat gateway conversion.  
Offramp markup fees will be charged in \$UNF

## **WHITELABEL**

Use WL solution with a fee split and subscription payment in \$UNF

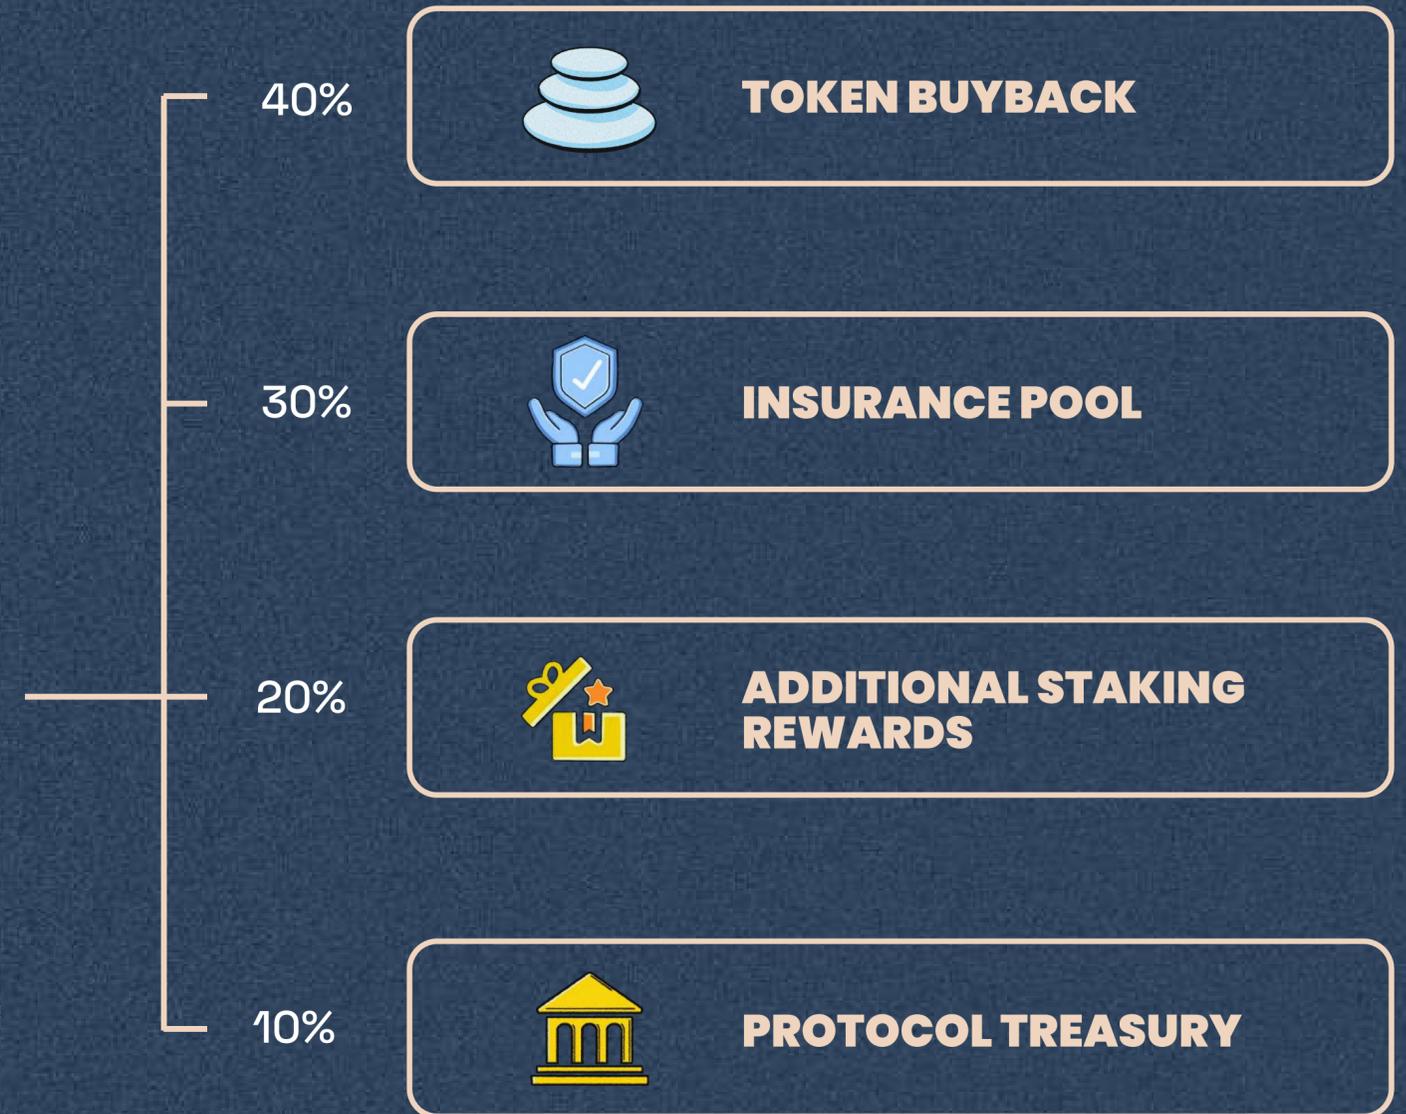

# TOKEN CIRCULATION

UNO charges performance fee.  
Fee amount can be governed  
by the DAO.

4% performance fee

# REVENUE FORECAST

## Positive scenario

YEAR	TVL	Yearly Platform Revenue
1 year	\$1B	\$12.95M
2 year	\$3B	\$38.85M
3 year	\$6B	\$77.71M

## Average scenario

YEAR	TVL	Yearly Platform Revenue
1 year	\$500M	\$16.48M
2 year	\$750M	\$19.71M
3 year	\$900M	\$11.66M

## Negative scenario

YEAR	TVL	Yearly Platform Revenue
1 year	\$150M	\$1.94M
2 year	\$225M	\$2.91M
3 year	\$450M	\$5.82M

<b>Platform Fee</b>	<b>4%</b>
---------------------	-----------

<b>Average Platform APY</b>	<b>32.38%</b>
-----------------------------	---------------

Average platform **APY** is determined by data parsing and yield analyzing of Yield Farming platforms (connected and planned to connect).

Expected **TVL** is determined by analyzing the TVL of direct competitors and DeFi market growth/fall forecasts.

# TOTAL SUPPLY:

Utility: UNF is a governance token that grants holders the right to raise and participate in decisions that affect the protocol. UNF holders and stakers also receive returns from protocol revenue.

# 1,000,000,000 UNF
